

CATALOGO GENERALE 2023

PROFILO AZIENDALE

COMPANY PROFILE

KRINO è orgogliosa di poter proseguire, con il marchio LTI, una tradizione manifatturiera italiana con oltre 50 anni di esperienza. La storia del marchio ha infatti inizio il 10 Maggio 1961 a Milano, quando Giuseppe Crosa fonda l'azienda. In quel periodo l'industria meccanica italiana conosce un momento di rapida espansione e genera una crescente richiesta di accessori per le operazioni di assemblaggio. L'azienda si specializza nella produzione di inserti per l'avvitatura. LTI si mostra subito capace di fornire prodotti che uniscono, all'elevata precisione, riconosciute caratteristiche di affidabilità e ciò ne permette l'affermazione in ogni settore produttivo: dalle linee di montaggio del settore automobilistico ed elettrodomestico, all'elettronica e fabbricazione di componenti di arredamento. Nel 2011 Krino acquisisce il marchio LTI e trasferisce, nella propria sede di Monticello Brianza, l'officina di produzione con lo stesso personale qualificato, garanzia di qualità del prodotto e del servizio. La crescente richiesta di inserti sempre più performanti, conseguente alla diffusione degli utensili a batteria ad elevate prestazioni in ogni settore del mercato, fino al bricolage, impone la necessità di una continua ricerca di nuovi materiali e soluzioni tecniche in grado di soddisfare al meglio le richieste del mercato. Il nuovo catalogo LTI è il risultato dei processi innovativi messi in atto da KRINO abbinati alla garanzia di qualità del prodotto che ha da sempre contraddistinto LTI.

With the LTI brand, KRINO is proud to continue an Italian manufacturing tradition lasting more than 50 years. In fact, Giuseppe Crosa founded LTI on 10 May 1961 in Milan. In those years, the Italian mechanical industry was expanding rapidly, generating a growing demand for equipment and accessories for assembly lines. The company specialised in the production of bits for screwing applications. In no time at all, LTI proved to be capable of supplying products that combined high precision with proven reliability. This allowed it to become successful in every production sector: on the assembly lines of cars and electrical household appliances, in electronics and the manufacturing of decor and furniture items. In 2011, Krino purchased the LTI brand and its experience and moved the production centre to its headquarters in Monticello Brianza, while keeping the LTI qualified personnel as guarantee of the quality of the product and service. The growing demand for more and more efficient bits resulting from the widespread use of high-performance cordless tools in every sector of the market, as well as the increasing popularity of DIY projects, led to the constant search for new materials and technical solutions able to effectively meet the requirements of the market. In this catalogue LTI, offer the result of our research and technical innovations.

ESPERIENZA EXPERIENCE

Un archivio di migliaia di disegni, moltissimi casi di problem-solving sulle linee di montaggio e impianti di avvitatura automatici, la collaborazione con i produttori di utensili per avvitatura industriale e con le viterie; questo il bagaglio di conoscenze che rende il marchio LTI sinonimo di qualità ed elevata affidabilità del prodotto.

An archive with thousands of drawings and designs, numerous special tools made for assembly lines and automatic screwing systems, constant collaboration with tool manufacturers for industrial screwing applications, and with screw manufacturers. This wealth of knowledge makes the LTI brand synonymous with quality and high reliability

RICERCA RESEARCH

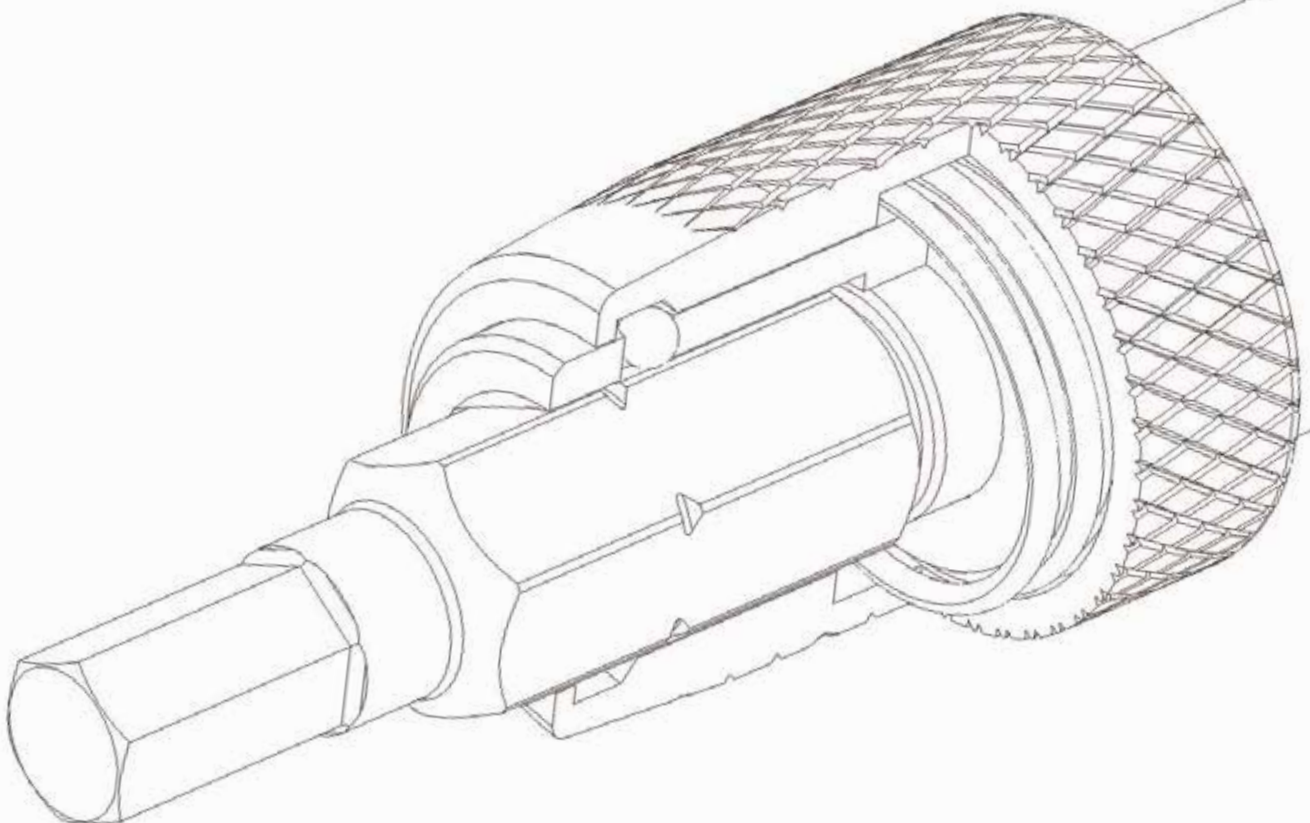

L'uso di avvitatori sempre più potenti, il bisogno di incrementare la produttività delle linee di montaggio, l'utilizzo di viti auto-formanti ed auto-perforanti anche su materiali estremamente duri ci spinge a cercare nuovi materiali con i quali poter ottimizzare il rapporto durezza/tenacità e nuove soluzioni produttive che possano offrire un ottimale accoppiamento tra vite ed inserto.

The use of more and more powerful screwdrivers, the need to increase productivity of the assembly lines, the use of self-forming and self-drilling screws even on extremely hard materials, inspires us to search for new materials that optimise the relationship between hardness and toughness and new production solutions that can offer excellent coupling between the screw and insert bit.

INNOVAZIONE INNOVATION

Su queste basi abbiamo fissato la progettazione e costruzione dei nuovi prodotti che offriamo, al mercato sia professionale che specialistico, in un'ampia varietà di materiali, proprietà tecniche, finiture e assortimenti, con un occhio di riguardo alle confezioni dedicate al punto vendita.

The design and manufacture of new products for the professional and specialist market is based on innovation. For this reason, our products are available in a wide variety of materials, technical properties, finishes and assortments with new packaging dedicated to stores.

PROGETTAZIONE E SVILUPPO DESIGN AND DEVELOPMENT

Il nostro ufficio tecnico è in grado progettare l'utensile più indicato alle esigenze dell'utilizzatore industriale e individuare, con l'aiuto del controllo qualità, il materiale ed il trattamento termico più idonei a garantire le migliori performances. Sviluppiamo un nuovo prodotto ogni due giorni.

Our technical office is able to design the tool best suited to the needs of the industrial user, and to identify, with the help of the quality service, the material and heat treatment best suited to ensure the best performances. We develop a new product every two days.

TORNITURA E PROFILATURA TURNING AND MILLING

Torni a CNC, per operazioni di elevata precisione, con i quali possiamo lavorare barre con diametri da 4mm a 20mm. Profilatrici specifiche per inserti. Questo il parco macchine di cui disponiamo per soddisfare le richieste della nostra clientela.

CNC lathes for high precision machining, which allows machining bars with diameters of 4mm to 20mm. Specific forming machines for bits. We have all the machinery to cater to the needs of our customers.

TEST DI QUALITÀ

QUALITY TEST

Il modernissimo e attrezzato laboratorio di controllo qualità garantisce l'intera produzione dei nostri utensili. Specifici e accurati controlli metallografici sull'acciaio che acquistiamo e sul prodotto che tempriamo assicurano elevate prestazioni dei nostri utensili nella sicurezza più completa.

The ultra-modern and well-equipped control laboratory guarantees the entire production of our tools. Specific and accurate metallographic controls on the steel that we purchase and on the product that we temper, ensures high performance of our tools in the utmost safety.

TRATTAMENTO TERMICO

HEAT TREATMENT

Siamo l'unica azienda in Italia e fra le poche in Europa a trattare internamente i propri inserti con un impianto di tempra sottovuoto. Questo tipo di tecnologia permette con assoluta certezza di evitare problemi di decarburazione ed ossidazione della superficie.

Internal heat treatment department: the only company in Italy and among the few in Europe to temper bits with a vacuum tempering plant. This type of technology prevents problems associated with oxidation and decarburisation of the surfaces

ARTICOLI SU RICHIESTA

CUSTOME-MADE ITEMS

La nostra azienda produce inserti per avvitatori secondo gli standard internazionali ma realizza anche prodotti su richiesta specifica e disegno del cliente anche per lotti di ridotta quantità. L'esperienza di cui dispongono i nostri tecnici è di supporto per la progettazione e la soluzione di ogni particolare necessità legate a operazioni di avvitatura su impianti automatici.

Tutte le lavorazioni meccaniche e il trattamento termico vengono eseguiti al nostro interno; per questo motivo garantiamo al nostro cliente massima flessibilità, un servizio custom fit ai massimi livelli per la realizzazione di prodotti di elevata qualità e specificità. Operiamo con successo nell'industria dei grandi elettrodomestici, delle catene di montaggio meccaniche, nei cantieri navali o aerospaziali; i nostri prodotti ogni giorno incontrano sfide importanti e i nostri clienti riconoscono il supporto costante e qualificato che offriamo loro.

Our company manufactures bits for drills and drivers in accordance with the international standards, as well as products to fit the exact specifications and requests of customers, including small quantities. The experience and expertise of our technicians supports the design and solution of each detail of automatic screwing operations.

The machining operations and heat treatments are all performed internally; for this reason, we are able to offer customers maximum flexibility, first-rate personalised service to create high quality and specific products. We work successfully in the field of household appliances, mechanical assembly lines, shipbuilding and aircraft production. Our products face important challenges every day and our customers recognise the constant and qualified support we offer them.

KRINO GROUP

Per raggiungere l'eccellenza nel servizio alla clientela offriamo oggi la possibilità di realizzare set e valigette con contenuti specifici: il nostro parco macchine si è infatti ampliato con una fresatrice taglia spugne che consente la realizzazione di sedi dedicate per l'inserimento di utensili e accessori su esigenza del cliente.

To achieve excellence in customer service we can offer you to create sets and cases with specific contents: our machine fleet has in fact been expanded with a sponge milling machine that allows the creation of dedicated seats for the insertion of tools and accessories on customer's request.

Il cliente può personalizzare il contenuto del set scegliendo gli utensili desiderati e decidendo il colore della spugna nella quale saranno disposti.

The customer can customize the contents of the set by choosing the desired tools and deciding the color of the sponge in which they will be arranged.

CONFEZIONAMENTO PACKAGING

5 - 10 pcs.

EASYPACK

1. Sacchetto PVC termosaldato con asola Euro-hole
2. Confezionamento in box di cartone

1. Heat-sealed PVC bag with Euro-hole
2. In cardboard box packaging

1 - 2 pcs.

SELFPACK

1. Tubo PP con tappo con asola Euro-hole
2. Clip PP appendibile con asola Euro-hole

1. PP tube with cap with Euro-hole
2. Hangable PP clip with Euro-hole

5 - 10 pcs.

MINIBOX

- Scatoletta PP richiudibile con asola Euro-hole

- Resealable PP box with Euro-hole

100 - 200 pcs.

1. TANK BOX 100 pcs.

- Barattolo PVC a vite con asola Euro-hole
- PVC screw jar with Euro-hole

2. BIG BAG 200 pcs.

- Sacchetto PVC richiudibile
- PVC resealable bag

Nel campo dell'avvitatura, applicazioni sempre più specifiche e avvitatori a batteria sempre più potenti richiedono utensili con caratteristiche adeguate a ciascuna particolare situazione ed in grado di garantire performances sempre più elevate. Le linee PREMIUM che presentiamo in questa prima sezione, sono il frutto dell'evoluzione di questi ultimi anni di lavoro in KRINO, dove l'esperienza e la conoscenza che contraddistinguono il marchio LTI, sono state valorizzate e sviluppate dai nostri ingegneri per offrire una gamma di prodotti all'altezza delle aspettative.

Increasingly more specific applications and powerful battery-operated drivers require the use of tools with the appropriate characteristics, able to guarantee the highest performances at all times. The PREMIUM lines featured in this first section come from the evolution over the years and KRINO's constant commitment to research. Our engineers have capitalised and built on the long experience and knowledge characterising the history of LTI to offer new innovative product lines for numerous projects and applications.

Applicazioni
applications

Trattenimento magnetico in quattro diversi formati e capacità per adattarsi correttamente ad ogni tipo e dimensione di vite.

Magnetic retention system in four different sizes and capacities able to hold any type and size of screw.

Codice colore per un riconoscimento facile e immediato sia della misura che del tipo di impronta.

COLOUR code for easy and immediate recognition of the size and profile of screw.

Sistema di trattenimento semplice e innovativo per risolvere molti problemi di avvitatura nel settore professionale.

Innovative simple retention system to solve many screwdriving problems in the professional sector.

INSERTI 1/4" PER AVVITATORI A MASSA BATTENTE 1/4" bits for impact wrenches

Applicazioni
applications

Progettati e testati per l'uso con avvitatori a massa battente.
Designed and tested for use with impact wrenches.

Alta resistenza agli impulsi, anche ad elevate velocità. Sopporta le sollecitazioni fino al 300% in più di un inserto tradizionale.
High pulse strength, even at high speeds. Withstands stress up to 300% higher than traditional bits.

Profilo ridotto per ottimizzare la resistenza agli sforzi di torsione, assorbe una deformazione doppia rispetto al normale.
Reduced profile to optimise resistance to twisting, withstands twice the deformation of normal bits.

**FOCUS ON**

- ① Corpo rinforzato
 - ② Sistema antishock per la salvaguardia del magnete
 - ③ Guaina di protezione del corpo
 - ④ Esagono ribassato che aumenta l'angolo di coppia preservando l'inserto dalla deformazione
- ① Reinforced body
 - ② Antishock system to protect the magnet
 - ③ Protection sheath for the body
 - ④ Low-rise hexagon that increases the torque angle, protecting the insert from deformation

Appositamente studiato per lavorare con gli inserti della gamma LTI PULSAR: le esclusive geometrie costruttive fanno sì che gli inserti lavorino al meglio, garantendo una durata e prestazioni straordinarie.

Designed specifically to work with the range of LTI PULSAR bits: the exclusive construction geometries optimise the work of the bits, guaranteeing durability and outstanding performances.

COUNTERTOP OR WALL-MOUNTED METAL WIRE STRUCTURE, SUITABLE FOR HOLDING BITS
IN 20 DIFFERENT SIZES, MINIBOX PACKED AND TWO ACCESSORIES.

FOCUS ON

1.1

AVVITATORI IDRAULICI O AD IMPULSI

Hanno una forza di serraggio elevata ottenuta attraverso rapidissimi incrementi della pressione dell'olio. A fine serraggio viene prodotta una coppia intermittente e la tensione assiale si stabilizza. La coppia massima può essere regolata tramite la taratura della pressione dell'olio (fig. 1).

HYDRAULIC OR PULSE WRENCHES

They have a high clamping force obtained through very rapid increases in oil pressure. An intermittent torque is produced at the end of clamping and the axial tension stabilises. The maximum torque can be adjusted by setting the oil pressure (fig. 1).

Diagramma della coppia di serraggio in un avvitatore idraulico ad impulsi.

Diagram of the tightening torque in a hydraulic pulse wrench.

AVVITATORI A MASSA BATTENTE

Sviluppano un'elevatissima forza di serraggio ottenuta mediante l'impatto di due parti metalliche, chiamate incudine e martello. A differenza degli avvitatori ad impulsi, la tensione assiale continua a crescere in funzione del tempo (fig 2).

IMPACT WRENCHES

They develop a very high clamping force obtained through the impact of two metallic parts, called the anvil and hammer. Unlike pulse wrenches, the axial tension continues to grow over time (fig. 2).

Diagramma della coppia di serraggio in un avvitatore a massa battente.

Diagram of the tightening torque in an impact wrench.

LTI®

INSERTI 1/4" TENACI RESISTENTI A COPPIE ELEVATE
 1/4" heavy duty bits, high torques resistant

ANGOLO DI TORSIONE torsion angle

ASSORBIMENTO COPPIA DI TORSIONE

Torque absorption / absorption du couple de torsion / absorción de la par de torsión

Applicazioni
 applications

L'esclusivo design permette di disperdere lo sforzo di torsione lungo tutto l'utensile.

The exclusive design allows distributing the torsional stress along the entire length of the tool.

Qualità tenace, indicata per assorbire i picchi di coppia negli avvvitamenti su materiali duri.

Tough grade, suitable for absorbing torque peaks when screwing into hard materials.

Minimizzando i picchi si riduce l'usura, massimizzando la vita dell'utensile.

Minimisation of peaks reduces wear and maximises tool life.

TORSION+

INSERTI 1/4" RESISTENTI A COPPIE ELEVATE EXTRA HARD
1/4" extra-hard bits torques resistant

Applicazioni
applications

RAPPORTO DUREZZA-TENACITÀ Hardness-toughness ratio

RESISTENZA ALL'USURA Wear resistance

Perfetto rapporto durezza/tenacità, TORSION+ raggiunge elevatissimi valori di resistenza alla torsione.

Perfect hardness/toughness ratio, TORSION+ reaches very high values of torsional stiffness.

Ottima resistenza all'usura: la geometria dell'impronta rimane costante anche dopo moltissimi cicli di avvitatura.

Excellent wear resistance: the geometry of the tip remains constant even after numerous screwing cycles.

Ideali per applicazioni intensive, anche nel settore industriale, dove l'efficienza dell'utensile deve rimanere costante per lungo tempo.

Ideal for heavy-duty applications, even in the industrial sector where tool efficiency must remain constant over a long time.

INSERTI 1/4" CON RIVESTIMENTO AL DIAMANTE 1/4" bits with diamond coating

Rivestimento diamante
elettrodepositato
*Electro-deposited diamond
coating*

RIDUZIONE DELL'EFFETTO COME-OUT *Reduced come-out effect*

Applicazioni *applications*

Le minuscole particelle di diamante fanno presa nella cava della vite, si riduce l'effetto come-out, l'operatore può avvitare con meno forza e più sicurezza.

The tiny diamond particles make grip in the screw recess, reducing the come-out recess effect; the operator may tighten with less force and more safety.

L'inserto non scivola dalla vite, diminuisce il rischio di rovinare sia la punta dell'utensile che la testa della vite.

The bit does not slip from the screw, which reduces the risk of damaging the tool tip and screw head.

L'ottimo grip che esercita questo rivestimento permette di utilizzare gli inserti HDC anche per svitare viti danneggiate o arrugginite.

The excellent grip exerted by this coating allows using HDC bits also to unscrew damaged or rusty screws.

TITANIUM

INSERTI 1/4" CON RIVESTIMENTO AL NITRURO DI TITANIO
1/4" bits with titanium nitride coating

Rivestimento nitruro di titanio PVD - TiN
PVD titanium-nitride coating - TiN

Applicazioni
applications

Rivestimento al nitruro di titanio estremamente duro (2500 HV), ottima resistenza all'usura e all'ossidazione.

Extremely hard titanium-nitride coating (2500 HV), excellent resistance to wear and oxidation.

Per avvitiamenti multipli a bassi valori di coppia.

For low torque screwing jobs.

Il rivestimento permette all'utensile di sopportare al meglio elevate e ripetute sollecitazioni aumentandone la vita.

The coating allows the tool to better withstand high and repeated stress, thus increasing its life.

STRUTTURA IN FILO METALLICO DA BANCO ED APPENDIBILE ADATTA AD ACCOGLIERE
20 MISURE DIVERSE DI INSERTI CONFEZIONATI IN MINIBOX E DUE ARTICOLI ACCESSORI.
COUNTERTOP OR WALL-MOUNTED METAL WIRE STRUCTURE, SUITABLE FOR HOLDING BITS
IN 20 DIFFERENT SIZES, MINIBOX PACKED AND TWO ACCESSORIES.

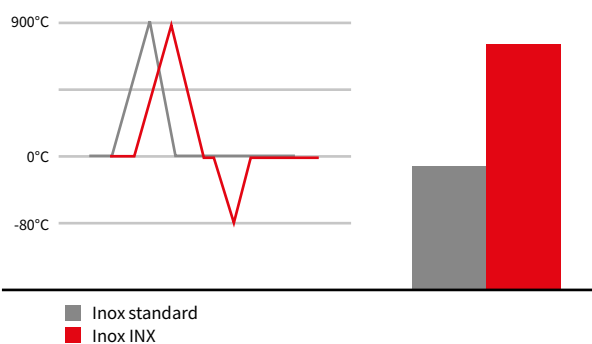

INSERTI 1/4" REALIZZATI IN ACCIAIO INOX 1/4" stainless steel bits

RESISTENZA ALLA CORROSIONE IN ATMOSFERA SALINA Resistance to corrosion in saline atmospheres

RAPPORTO RESISTENZA ALL'USURA-RINVENIMENTO CRIOGENICO Wear resistance-cryogenic recovery ratio

Applicazioni
applications

Interamente realizzati in acciaio inossidabile.
Made entirely of stainless steel.

Per lavori in condizioni estreme: resistono alla corrosione anche a contatto con acqua di mare.
For extreme conditions applications: corrosion resistant, even in contact with seawater.

Indicati per l'uso con viteria INOX in quanto non provocano / innescano ossidazioni.
Suitable for use with stainless steel screws as they do not cause or generate oxidation.

FOCUS ON

1.1

CORROSIONE

Gli acciai INOX sono leghe di ferro caratterizzate, oltre che dalle proprietà meccaniche tipiche degli acciai al carbonio, da una notevole resistenza alla corrosione. Tale capacità è dovuta alla presenza di elementi di lega, principalmente cromo, in grado di ricoprirsi di uno strato di ossidi aderente e invisibile che protegge il metallo sottostante dall'azione degli agenti chimici esterni (acqua, sale, altri metalli...). I principali tipi di corrosione a cui è soggetto l'acciaio INOX sono quella in ambiente salino (corrosione salina) oppure quella dovuta a contaminazione da altri metalli (corrosione galvanica). Proprio per quest'ultimo motivo è preferibile utilizzare gli inserti INOX con viteria INOX o, se ciò non fosse possibile, interporre del materiale isolante tra gli stessi.

Camera per test corrosione INOX in nebbia salina.

Chamber for STAINLESS STEEL corrosion tests in a saline mist.

CORROSION

Stainless steels are iron alloys characterised not only by the typical mechanical properties of carbon steel, but also by a remarkable resistance to corrosion. This ability comes from the presence of alloy elements, primarily chromium, which are able to cover themselves with an adhering and invisible oxide layer that protects the underlying metal against the action of external chemical agents (water, salt, other metals, etc.).

STAINLESS steel is particularly prone to corrosion in saline environments (saline corrosion) or corrosion caused by contamination with other metals (galvanic corrosion). For this last reason, it is preferable to use STAINLESS STEEL BITS with STAINLESS STEEL screws or, if this is not possible, to place insulating material between them.

Esempio di corrosione galvanica dovuta dall'accoppiamento di dadi e bulloni in acciaio INOX su una piastra in acciaio.

Example of galvanic corrosion caused by combining stainless steel details on a steel plate.

LTI®

INSERTI 1/4" CON CRESTE ANTISCIVOLAMENTO 1/4" bits with Anti Come-out Ribs

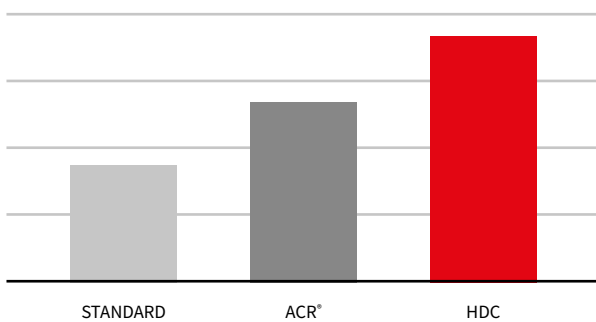

ACR = creste
antiscivolamento
ACR = nonslip
ridges

Applicazioni
applications

RIDUZIONE DELL'EFFETTO COME-OUT Reduced come-out effect

Ideali per applicazioni su materiali duri anche in presenza di ruggine: il sistema ACR[®] distribuisce più efficientemente la forza applicata.

Ideal for applications using hard materials, even in the presence of rust: the ACR[®] system distributes the force applied in a more efficient way.

Perfetta aderenza anche con viti verniciate o smaltate, tipiche del settore aeronautico.

Perfect grip even with painted or enamelled screws typically used in the aviation industry.

Le creste sulla punta dell'inserto aumentano l'aderenza nella cava della vite, riducendo lo scivolamento e il conseguente effetto come-out.

The ridges on the tip of the bit increase grip in the cavity of the screw, reducing slippage and consequently, the come-out effect.

COME SCEGLIERE L'INSERTO PREMIUM

HOW TO CHOOSE THE RIGHT PREMIUM BIT

VITI AUTOFILETTANTI PER LEGNO

Self-tapping screws for wood

RECOMMENDED

p. 78

Lo sforzo cresce progressivamente fino al picco massimo quando la testa della vite penetra nel legno. In caso di legni duri questi sforzi possono essere elevati.

The stress grows progressively until reaching maximum peak when the head of the screw penetrates the wood. In case of hard wood, this stress can be very high.

VITI AUTOFILETTANTI PER METALLO

Self-tapping screws for metal

RECOMMENDED

p. 52 p. 66

Lo sforzo, inizialmente elevato, diventa costante dopo la creazione del filetto, per poi raggiungere il picco al termine del lavoro.

The stress, initially high, becomes constant after the thread has been created, and then reaches its peak at the end of the work.

VITI AUTO-FORANTI

Self-drilling screws

RECOMMENDED

p. 32

Nelle prime fasi si ha un picco di sforzo per la creazione di foro e filetto e le viti tendono a disallinearsi rischiando di rovinare il piano di avvitatura.

Given the particular use, when making the hole the screws tend to become misaligned and may ruin the material that is being worked.

VITI TRI-LOBATE

Tri-lobe screws

RECOMMENDED

p. 78

Data la particolare sezione della vite lo sforzo è molto elevato durante tutte le fasi dell'avvitatura.

Given the particular section of the screw, the stress is very high throughout the entire screwing operation.

VITI LUNGHE PER COPERTURE

Long screws for roofs

RECOMMENDED

p. 78 p. 52

Durante la fase di avvitatura nel legno lo sforzo cresce repentinamente fino a raggiungere coppie estremamente elevate.

When screwing into wood, the stress increases until reaching extremely high torques.

VITI VERNICIATE O DANNEGGIATE

Painted or damaged screws

RECOMMENDED

p. 90 p. 124

In presenza di teste di viti arrugginite o verniciate il grip dell'inserto tende a diminuire rendendo particolarmente difficoltose le operazioni.

In the presence of rusty or painted screw heads, the grip of the insert bit tends to decrease, making it particularly difficult to perform the operations.

T = TORSIONE - TORQUE

t = TEMPO - TIME

Gli inserti con attacco da 1/4" rappresentano senza dubbio la parte più significativa del mercato degli utensili per avvitatori. Ogni produttore deve quindi essere in grado di offrire ai propri clienti una gamma sufficientemente ampia di forme e di lunghezze, così da poter "risolvere il problema" in ogni occasione. Le linee di prodotti standard (ESSENTIAL) che presentiamo in questa sezione rispondono esattamente a queste necessità. Anche il confezionamento ed i metodi di presentazione sul punto vendita costituiscono un'aspetto del prodotto. Per questo motivo abbiamo sviluppato nuove e diversificate soluzioni espositive, che vanno dal bit-set più semplice all'espositore più completo.

Insert with 1/4" attachment account for the largest slice of the market of tools for drivers. As a manufacturer, we are able to offer our customers a wide range of shapes and lengths, so that they can be the ideal choice for any application. The standard or ESSENTIAL product lines presented in this section perfectly meet these requirements. The packaging and presentation of the products in the store is also an important aspect and we have worked hard to develop a complete range of counter displays, which include innovative pocket-sized bit sets with a brand new design.

FOCUS ON

La fresatura, o più correttamente profilatura, è la lavorazione per asportazione di truciolo che viene eseguita per realizzare l'impronta dell'inserto. Noi la eseguiamo con apposite macchine costruite in Germania ed utensili per fresatura specifici per ogni misura di impronta. La profilatura, unitamente all'operazione di tornitura, riescono a garantire alle geometrie dell'inserto una precisione superiore rispetto al metodo di stampatura a freddo.

Milling, or more correctly, profiling, is the chip removal process which is performed to create the tip of the insert bit. We perform this with special milling machines and tools specific to each tip size. Profiling, together with the turning operation, gives the bit greater geometric precision than cold pressing.

Questi inserti sono specifici per utilizzi dove non siano applicate elevate coppie di serraggio: su legni teneri o lamiera. L'elevata durezza preserva l'integrità dell'impronta e aumenta l'efficienza dell'utensile.

These bits are specifically for applications that do not require the use of high torques: on soft wood or sheet metal. The extra hardness preserves the integrity of the tip and increases tool efficiency.

FOCUS ON

La bussola copre la testa della vite: in questo modo si evita di penetrare eccessivamente nel cartongesso facilitando così le operazioni di stuccatura.

The socket covers the head of the screw: this prevents excessive penetration into plasterboard, thus facilitating the grouting operations.

**FOCUS ON**

L'impronta TX conica raggiunge il massimo della tolleranza dimensionale.

- Tutto il profilo dell'inserto aderisce alla cava della vite (mentre la standard è sempre leggermente lasca), trasmette più uniformemente la coppia di serraggio e si consuma meno.
- L'inserto rimane in asse con la vite rendendo più veloce e sicura l'avvitatura.

The tapered TX tip reaches the maximum dimensional tolerance.

- The entire profile of the insert sticks to the cavity of the screw, while the standard is always slightly loose, spreading the tightening torque more evenly and contributing significantly to less wear and tear.
- The bit remains in axis with the screw for faster and safer screwing.

FOCUS ON

Le viti TORX-PLUS® IPR trovano vasta applicazione nel campo degli assemblaggi meccanici. La loro particolare forma garantisce un'inviolabilità quasi assoluta.

TORX-PLUS® IP screws come from the evolution of the traditional TORX® tip to ensure high resistance to torsional stress. This type of tip is used in the mechanical field and to clamp turning tools.

FOCUS ON

Le viti TORX-PLUS® IP nasce come evoluzione dell'impronta TORX® tradizionale per garantire un'elevata resistenza alla coppia di torsione. Questo tipo di impronta viene utilizzata in campo meccanico e per il serraggio degli utensili da tornio.

TORX-PLUS® IPR screws are widely used in the field of mechanical assemblies. Their special shape ensures almost absolute inviolability.

FOCUS ON

Queste bussole evitano che la vite a taglio scappi dalla lama durante l'avvitatura e sono appositamente disegnate per essere utilizzate con inserti COD. 61022 e portainseriti COD. 62012 o COD. 62014.

These sockets prevent the slotted screw from coming out of the blade during screwing. They are specifically designed to be used with bits, code 61022 and bit holders, code 62012 or code 62014.

FOCUS ON

PHILLIPS®

Phillips® è un marchio registrato di PHILLIPS SCREW COMPANY, fondata da Hensy F. Phillips nel 1934 e cominciò ad essere largamente utilizzata nel 1940 dalla General Motors per l'assemblaggio delle Cadillac. La sua caratteristica principale sta nell'essere autocentrante, è quindi particolarmente indicata negli assemblaggi industriali su linee automatizzate.

Phillips® is a registered trademark of PHILLIPS SCREW COMPANY, which was founded by Henry F. Phillips in 1934. The Phillips screw began to be widely used in 1940 by General Motors for the assembly of the Cadillac. Its self-centring feature makes it particularly suitable for automatic assembly lines.

POZIDRIV®

POZIDRIV® è un marchio registrato di PHILLIPS SCREW COMPANY e venne sviluppato agli inizi degli anni '60. Si differenzia dall'impronta PHILLIPS® per avere una doppia serie di creste a croce; le creste principali hanno spessore costante che evita l'effetto di Come-Out. POZIDRIV® trova maggior impiego nel settore del legno.

POZIDRIV® is a registered trademark of PHILLIPS SCREW COMPANY and was developed in the early sixties. Unlike the PHILLIPS® tip, it has two series of cross-shaped ridges; the main ridges have a constant thickness that minimises the come-out effect. POZIDRIV® is widely used in the wood and timber industry.

TORX®

TORX® è un marchio registrato di ACCUMENT GLOBAL TECHNOLOGIES e brevettato nel 1967 da Camcar Textron. TORX® sopporta coppie più elevate rispetto alle viti PH a parità di dimensioni. Ha largo utilizzo in campo automotive. Le sue varianti sono: con foro (TXH), Torx Align® (conico, TW), Torx Plus® (IP), Torx Plus® con foro (IPR).

TORX® is a registered trademark of ACCUMENT GLOBAL TECHNOLOGIES and was patented by Camcar Textron in 1967. TORX® supports higher torques than PH screws of the same size. It is widely used in the automotive industry. It comes in the following versions: with slot (TXH), Torx Align® (tapered, TW), Torx Plus® (IP), Torx Plus® with slot (IPR).

ESAGONO

La vite con cava esagonale, inventata da Mr. W.G. Allen (1910), prende il nome italiano dalle Officine Egidio Brugola di Lissone che per prime la produssero e distribuirono in Italia. È utilizzata su viti con filettatura metrica ed impiegata principalmente in ambito meccanico, automotive e/o carpenteria metallica.

The hex socket screw was invented by W.G. Allen in 1910, the Italian name comes from the founder of the Officine Egidio Brugola of Lissone who first produced and marketed it in Italy. It is used on screws with metric thread, mainly in the mechanical, automotive and/or metal carpentry industries.

TAGLIO

Le prime tracce di viti con intaglio risalgono al tardo Medioevo. Le prime documentazioni si trovano nel Housebook medievale del castello di Wolfegg in Germania, in un manoscritto del 1490. Vengono oggi utilizzate soprattutto in ambito elettrico ed elettronico.

The first traces of slotted head screws date back to the late medieval period. Documentation was found in the Medieval Housebook of the castle of Wolfegg - Germany, a manuscript of 1490. Today, they are used mainly for electrical and electronic applications.

**FOCUS ON**

Una sfera che agisce sulla superficie del dado/bullone esercitando il trattenimento anche su acciaio inox, ottone o altri metalli non ferrosi.

A ball that acts on the surface of the nut/bolt, exerting retention even on stainless steel, copper or other non-ferrous metals.

TIPS

Chiavi a bussola ad alta resistenza realizzate in acciaio speciale al cromo-silicio-vanadio, utilizzabili anche con avvitatori ad impulsione. (N.B: La massima forza applicabile non deve superare quelle indicate per l'attacco esagonale 1/4", vedi dati tecnici in coda al catalogo)

High-strength nut setters made of special chrome-silicon-vanadium steel, which can also be used with impact wrenches. (N.B: The maximum forces that can be applied must not exceed those specified for 1/4" hex attachments, see technical data at the end of the catalogue)

FOCUS ON

Su richiesta possiamo realizzare chiavi a bussola fino a lunghezza 390 mm, con cave differenti (es. poligonale, TORX® femmina, quadro). Siamo inoltre in grado di tarare la durezza finale in base alle specifiche necessità.

On request, we are also able to manufacture nut setters up to 390 mm long, with different slots (e.g. polygonal, TORX® female, square). We are also able to calibrate the final hardness according to specific needs.

FOCUS ON

Il sistema magnete retrattile permette sia il trattenimento magnetico del dado che l'ingresso libero della vite nella chiave per una profondità massima di 18mm.

The retractable magnet system allows both magnetic retention of the nut and the free entry of the screw into the nut setter for a maximum depth of 18mm.

Fino a non molti anni fa esistevano solo due tipi di porta-inserti: quello non magnetico e quello magnetico. Oggi le soluzioni offerte sono molte e scegliere l'accessorio giusto può essere di aiuto a rendere più facile il lavoro. Per questo motivo, la terza sezione del capitolo, dedicata agli accessori per inserti da 1/4", è ampiamente corredata di indicazioni e suggerimenti utili per individuare correttamente l'accessorio più adatto.

The market for bit holders offers solutions that are increasingly more specific and that adapt well to the working conditions or workpieces. Having the right accessory will make the job easier and faster. For this reason, the third section of the chapter contains accessories for 1/4" bits together with lots of useful suggestions and tips on how to find the most suitable accessory for every type of application or work environment.

PORTAINSERTI

PORTAINSERTI PER INSERTI 1/4" C E LAME 1/4" E
Bit holder for 1/4" C bits and 1/4" E power-bits

Corpo in acciaio INOX (HRA 64/66) resistente alle sollecitazioni trasmesse dall'inserto. Magnete permanente in Neodimio-Ferro-Boro; forza di trattenimento superiore del 100% a quanto richiesto dalle normative internazionali.

Body in STAINLESS steel (HRA 64/66), resistant to stress transmitted by the insert bit. Permanent magnet in Neodymium-Iron-Boron; retention strength greater than 100% as required by international standards.

Attacco in S2, lo stesso materiale utilizzato per la fabbricazione degli inserti Essential. Ottima resistenza all'usura.

Attachment in S2, the same material used to manufacture the Essential bits. Excellent wear resistance.

Materie prime di ottima qualità utilizzate per la fabbricazione dei nostri porta-inserti, come gli inserti.

Our bit holders and bits are made using raw materials of the highest quality.

Progettati per funzionare al meglio in coppia con tutti gli inserti della gamma LTI.

Designed to work best in combination with LTI range bits.

Ampia scelta di soluzioni per rendere più facile qualsiasi operazione di assemblaggio.

Wide range of solutions to make any assembly operation easier.

COME SCEGLIERE IL PORTAINSERTO

HOW TO CHOOSE A BIT HOLDER

NON MAGNETICI

Non-magnetic

RECOMMENDED

Quando si lavora in presenza di limatura, polvere o trucioli d ferro.
For working in the presence of filings, dust or iron shavings.

DOPPIO MAGNETE

Double magnets

RECOMMENDED

Con viti di grosse dimensioni o lunghe (viti per coperture edilizie).
With large or long screws (screws for building roofs).

SGANCIO RAPIDO

Quick release

RECOMMENDED

Se si devono indossare guanti, o se le mani sono sporche di olio.
If you have to wear gloves or if your hands are oily.

SNODATI O FLESSIBILI

Jointed or flexible

RECOMMENDED

Vicino ad uno spigolo (zoccolini, mobili, cassetti, motori di auto, parafanghi).
Close to an edge (skirting boards, furniture, drawers, car engines, mudguards).

MANDRINO DI BLOCCO

Chuck

RECOMMENDED

Se l'inserto si blocca nella cava della vite, se il punto in cui va posizionata la vite è difficilmente raggiungibile.

If the bit becomes stuck in the slot of the screw, if the point where the screw is to be positioned is difficult to reach.

BUSSOLE MAGNETICHE

Magnetic sockets

RECOMMENDED

In caso di fori profondi o alloggiamenti particolarmente stretti.
In case of deep holes or particularly tight seats.

ADATTATORI

ADATTATORI PER BUSSOLE 1/4" C E 1/4" E
Adapters for 1/4" C and 1/4" E sockets

A = secondo DIN 3121 Forma E, con perno di trattenimento in acciaio per molle. Indicati per l'utilizzo con bussole IMPACT; il perno assicura il bloccaggio della bussola evitandone la perdita anche su impianti automatici.

A = according to DIN 3121 Form E Standard, with retention pin in spring steel. Suitable for use with IMPACT sockets; the pin ensures the locking of the socket, preventing loss even on automatic systems.

B = secondo DIN 3120 Forma A, con sfera in acciaio. Indicati per l'utilizzo con bussole CHROME; la sfera favorisce il montaggio e lo smontaggio della bussola.

B = according to DIN 3120 Form A Standard, with steel ball. Suitable for use with CHROME sockets; the ball facilitates assembly and disassembly of the socket.

Realizzati con lo stesso acciaio di alta qualità utilizzato per gli inserti che offre un ottimo equilibrio tra durezza e tenacità.

Made with the same high-quality steel used for the bits, which provides an excellent combination of hardness and toughness.

Progettati per il massimo rendimento in coppia con le bussole IMPACT e CHROME della gamma LTI.

Designed for maximum performance in combination with IMPACT and CHROME sockets from the LTI range.

La gamma comprende anche la versione con attacco SDS PLUS in uso sui trapani martellatori per edilizia.

The range also includes the version with SDS PLUS attachment for use on hammer drills in the construction industry.

FOCUS ON

Diametro foro 7mm, doppio magnete, trattenimento fino a 400 gr. Agisce anche a 12cm dalla vite. Si consiglia di forzare la bussola sull'attacco esagonale per assicurarne la posizione. Indicato anche per giravite con lama fino a diametro 7.

Hole diameter of 7 mm, two magnets, retention up to 400 g. Also acts at a distance of up to 12cm from the screw. Recommended for mounting the socket onto the hexagon attachment to ensure its position. Suitable also for screwdrivers with minimum blade diameter of 7.

Il capitolo 2 è dedicato alle tipologie di inserti più speciali ed indicati per campi di applicazione particolari come il settore industriale, quello meccanico o dell'elettronica. In questi ambiti vengono infatti richiesti anche inserti ed accessori con attacchi differenti da quello presentato nel primo capitolo. Il reparto di produzione interno, dotato di moderne macchine per la lavorazione ed il trattamento termico, ci permette inoltre di studiare e realizzare utensili secondo le specifiche indicate dal cliente stesso. Sono ormai migliaia i codici di inserti ed accessori speciali che abbiamo fabbricato per clienti di tutto il mondo.

Chapter 2 is devoted to specific types of bits, manufactured expressly for special applications in the industrial, mechanical, electronic or precision sectors. In fact, these sectors require bits and accessories with attachments and tips different from those presented in the first chapter. Our internal production department, equipped with modern machinery for machining and heat treatments, allows us to design and create tools according to customer specifications. We produce thousands of special bits and accessories for our customers around the world.

SPECIALI

INSERTI E CHIAVI SPECIALI PER L'INDUSTRIA, L'AUTOMAZIONE E LA MANUTENZIONE

Special bits and setters for the industrial, automation and maintenance sectors.

1

Nel campo meccanico, per la produzione e riparazione di motori, e nella cantieristica, ambiti nei quali è necessario l'uso di fasteners di diametri elevati e a massime prestazioni, vengono utilizzati inserti con attacco maggiorato ed impronte a 6 e 12 lobi che permettano una migliore distribuzione della coppia di serraggio. Un appropriato acciaio al Cromo Silicio Vanadio garantisce una elevata resistenza ed una maggiore elasticità.

Bits with larger attachments and tips with 6 and 12 lobes, which provide better distribution of the tightening torque, are commonly used in the mechanical industry for the production and repair of engines, and in shipbuilding yards. These areas require the use of fasteners with wide diameters and high performances. Chrome-silicon-vanadium steel guarantees high resistance and greater elasticity.

2

I dispositivi elettronici sono ormai nelle mani di tutti e, con loro, le micro viti sono largamente diffuse. Prerogativa di questo tipo di fasteners è l'estrema precisione: è molto facile rovinare l'impronta o il filetto. Per questo tipo di applicazioni abbiamo selezionato una serie di inserti con le impronte più comuni, realizzati con un acciaio apposito, estremamente tenace, per evitare deformazioni del l'impronta che possano danneggiare la cava della vite.

Suitable for the production of electronic devices where micro-screws are widely used. The special feature of this type of fastener is its extreme precision: it is very easy to ruin the tip or thread. For these types of applications, we selected a series of bits with more common tips, made with special, extremely strong, steel to prevent deformations of the tip that might damage the slot of the screw.

3

La produzione di utensili per applicazioni industriali e per impianti di assemblaggio automatizzati è sicuramente un settore nel quale il marchio LTI si è da sempre contraddistinto. Grazie a questa nostra specificità, da sempre apprezzata dai nostri clienti, ogni due giorni introduciamo un nuovo codice prodotto. Abbiamo quindi selezionato una gamma di utensili industriali sempre disponibili a magazzino e con un prezzo di listino fisso a prescindere dalla quantità, ponendo la massima attenzione alla qualità per garantire la massima affidabilità.

The LTI brand has always been a pioneer in the production of tools for industrial applications and for automated assembly systems. For this case, we also offer a range of industrial tools that are always in stock, placing maximum attention on the construction to guarantee maximum reliability.

FOCUS ON

I dispositivi elettronici sono ormai nelle mani di tutti e, con loro, le micro viti sono largamente diffuse. Prerogativa di questo tipo di fasteners è l'estrema precisione.

Suitable for the production of electronic devices where micro-screws are widely used. The special feature of this type of fastener is its extreme precision.

FOCUS ON

Connessione di tipo rinforzato, ottimizza la resistenza del filetto evitando la necessità di ridurre la durezza.

Il sistema inserto + portainseriti risulta estremamente indicato nelle applicazioni industriali con avvitatori automatici/autoalimentati e su impianti di avvitatura complessi. In questi casi sono estremamente importanti l'affidabilità del prodotto e la sua capacità di resistere all'usura. Per questi motivi i nostri inserti vengono realizzati con tolleranze minime su macchine estremamente precise con l'obiettivo di garantire la massima qualità. La connessione di tipo rinforzato permette inoltre di mantenere elevata la durezza dell'inserto.

Reinforced connection optimises the resistance of the thread, preventing the need to reduce the hardness.

The bit + bit-holder system is very suitable in industrial applications that use automatic/fixtured screwdrivers and complex screwing systems. In these cases, product reliability and wear resistance are extremely important. For these reasons, our bits are manufactured with minimum tolerances on high-precision machines aimed at ensuring maximum quality. The reinforced connection also allows maintaining excellent hardness of the bit.

FOCUS ON

Esempio di avvitatore autoalimentato con applicazione di portainseri ed inserto filettati (per gentile concessione di MTA TECH S.r.l.)
Example of self-powered screwdriver with application of bit holder and threaded insert (by kind permission of MTA TECH S.r.l.)

I nostri portainseri filettati sono realizzati con lo stesso acciaio di alta qualità che utilizziamo per gli inserti. Il trattamento termico è calibrato per ottenere anche in questo caso il miglior equilibrio tra durezza e tenacità. Come ultima fase di lavorazione, prima dello stoccaggio, viene controllata la rettilinearità di questi prodotti e viene eventualmente eseguita un'operazione di raddrizzatura al fine di garantire una concentricità non inferiore a 0,1mm.

Our threaded bit holders are made with the same high-quality steel used for the bits. The heat treatment is calibrated to obtain the best balance between hardness and toughness. As a final machining phase before storage, the straightness of these products is checked and if necessary, they are straightened to ensure concentricity of not less than 0.1 mm.

TIPS

Su richiesta realizziamo anche gli adattatori con attacco 1/4" ed innesto alesato. Per avvitatori autoalimentati tipo vegetti.

On request, we also produce adapters with 1/4" attachment and bored coupling. For self-powered screwdrivers.

Le bussole con attacco quadro sono l'utensile utilizzato per l'avvitatura nel settore automotive e della carpenteria pesante. Con gli avvitatori a massa battente è indispensabile, anche per motivi di sicurezza, utilizzare bussole ed accessori IMPACT, mentre negli altri casi possono essere utilizzate bussole ed accessori cromati. In questo capitolo presentiamo entrambe le soluzioni, a completamento delle linee di utensili per avvitatori nell'ottica di un servizio adeguato ed esaustivo per tutta la nostra clientela.

Sockets with square attachment are used for screwing applications in the automotive and heavy carpentry industries. With impact wrenches it is essential, also for safety reasons, to use IMPACT sockets and accessories, while standard sockets and accessories can be used in other cases. In this chapter we present both solutions to complement the range of tools for screwdrivers with a view to provide an adequate and exhaustive service.

BUSSOLE E ACCESSORI IMPACT *IMPACT sockets and accessories*

Costruite in acciaio da bonifica al Nickel Cromo Molibdeno, secondo gli standard internazionali. Rivestimento protettivo anti-ossidazione.

Manufactured in Nickel-Chrome-Molybdenum tempered steel, according to international standards. Protective anti-oxidation coating.

Spigoli del quadro e dell'esagono arrotondati per distribuire meglio lo sforzo di torsione e minimizzare il rischio di rottura.

Edges of the square and hexagon are rounded to better distribute torsional stress and minimise the risk of breakage.

Specificatamente indicate per gli usi industriali, con avvitatori ad impulsi e/o a massa battente.

Suitable for industrial use, with pulse and/or impact wrenches.

FOCUS ON

Le ghiera filettate autobloccanti (KMA - GUK - GUP) si riconoscono dalla presenza di un anello interno di nylon che, al momento dell'avvitamento, crea un effetto bloccante tra vite e madre-vite.

The self-locking threaded ring nuts (KMA - GUK - GUP) are recognised by the presence of an inner nylon ring that, at the time of screwing, creates a blocking effect between the screw and mother-screw.

CHROME

BUSSOLE E ACCESSORI CHROME *CHROME sockets and accessories*

Realizzate in acciaio al Cromo Vanadio di alta qualità. Collare godronato per una miglior presa e resistente rivestimento superficiale di cromatura.

Made in high quality Chrome-Vanadium steel. Knurled collar for better grip and resistant chrome-plated surface coating.

Impronta esagonale tipo SUPER- LOCK: il contatto con il dado non avviene sullo spigolo ma sulla faccia dell'esagono, che offre una maggior superficie di appoggio.

SUPER-LOCK hex tip: the contact with the nut does not take place on the edge, but on the face of the hexagon, which offers a larger support surface.

Indicate per applicazioni manuali in ambito professionale.

Suitable for professional manual applications.

Le conoscenze maturate con gli utensili per avvitatori ci permettono di offrire anche una gamma base di utensili manuali di alta qualità. Una gamma base di tipologie usate in operazioni di avvitatura, corredate di assortimenti e confezioni dedicati all'esposizione in punto vendita.

The knowledge gained from the production of tools for screwdrivers allows us to offer a basic range of high-quality hand tools to complement the range offered in the previous chapters, and the range of tips used in screwing operations, equipped with different collections and packaging for store displays.

MODULO 5	MODULO 6
MODULO 7	MODULO 8
MODULO 9	MODULO 10
MODULO 11	MODULO 12

Componi la tua parete in 5 mosse:

Compose your display wall in 5 moves:

- 1** Individua la categoria merceologica di tuo interesse.
Identify the product category of your interest.
- 2** Individua la famiglia prodotto di tuo interesse.
Identify the product family of your interest.
- 3** Scegli la profondità di assortimento desiderata tra soluzioni a 1 o più moduli.
Choose the desired assortment depth from 1- or multi-module solutions.
- 4** Individua codice e prezzo del modulo pre assortito.
Identify pre-sorted module code and price.
- 5** Infine, componi il mix di assortimento che risponde alle tue esigenze.
Grazie al sistema espositivo multilivello, per ogni metro lineare è possibile comporre la tua esposizione in modo flessibile, sfruttando un massimo di 12 moduli espositivi.
Finally, compose the assortment mix that meets your needs.
With the multilevel display system, for each linear meter you can flexibly compose your display, taking advantage of up to 12 display modules.

Rivolgiti all'agente di zona per consultare il dettaglio di ciascun assortimento e per ulteriori informazioni.

Contact your local agent to see the details of each assortment and for more information.

CONDIZIONI DI VENDITA

GENERAL SALES CONDITIONS

Le condizioni di seguito riportate si intendono accettate dal committente in fase di ordinazione.

1. ORDINI:

Con il conferimento dell'ordine si intendono approvate dal committente tutte le condizioni di vendita in vigore, salvo accordi particolari accettati dai contraenti. Tutti gli ordini sono irrevocabili da parte del committente ma potranno non essere da noi evasi a nostro insindacabile giudizio e senza obbligo di comunicazione o giustificazione. Nell'ordine è necessario specificare il codice dell'articolo.

2. PREZZI:

I prezzi si intendono per merce franco nostro magazzino (imballo, iva, trasporto esclusi) e non sono impegnativi. I prezzi che avranno valore saranno quelli in vigore al momento della spedizione.

3. IMBALLO:

Gratuito, salvo specifiche richieste del committente, che verranno fatturate al costo.

4. SPEDIZIONE:

Verrà effettuata come segue:

a) a mezzo nostro corriere di fiducia, in porto franco con addebito in fattura, in tal caso la merce sarà parzialmente assicurata** (vedere punto 10 dell'elenco);

b) a corriere di fiducia del committente: la resa sarà franco nostro stabilimento di Monticello e la merce viaggia a totale rischio e pericolo del committente. Pertanto in caso di ritardi, ammanchi, avaria, furti, etc. i reclami devono essere indirizzati al Vettore, solo ed unico responsabile.

5. CONSEGNE:

Il termine di consegna, qualora venisse indicato, è puramente indicativo e pertanto solleva la nostra società da ogni qualsivoglia rivalsa.

6. RECLAMI:

Debbono pervenire per iscritto entro 8 giorni dalla data di ricevimento merce. Trascorso tale termine, i reclami non verranno accettati. I reclami di qualsiasi natura non sospendono l'obbligo di effettuare i pagamenti nella forma convenuta. L'acquirente, nel caso che la merce sia da noi ritenuta non idonea, ha diritto esclusivamente alla sostituzione della stessa o all'accredito dell'importo. Ogni altro tipo di indennizzo si intende privo di valore. Per qualsiasi contestazione si elegge unico foro competente quello del Tribunale di Lecco.

7. RESI:

Ogni reso o sostituzione dovrà essere preventivamente autorizzato da KRINO SPA. La merce sarà accettata di ritorno, salvo verifica all'arrivo in magazzino. Questa dovrà essere inviata in porto franco e accompagnata dalla bolla di consegna con indicati gli estremi della fattura con la quale è stata precedentemente fornita.

8. PAGAMENTI:

Debbono essere effettuati esclusivamente alla nostra sede, secondo le forme concordate. Nel caso di ritardato pagamento, verranno addebitati gli interessi bancari dalla data di scadenza concordata sino all'avvenuto pagamento, maggiorati delle eventuali spese accessorie.

9. CARATTERISTICHE DEI PRODOTTI:

Le immagini contenute nel presente catalogo sono puramente indicative, pertanto la nostra azienda si riserva il diritto di apportare modifiche migliorative dei prodotti senza nessun obbligo di preavviso.

**LA RIPRODUZIONE ANCHE PARZIALE
DEL PRESENTE CATALOGO È VIETATA.**

10. VALORE DELL'ORDINE:

La spedizione verrà effettuata come segue:

- ordini singoli (non cumulabili) di importo superiore a Euro 600,00: spedizione in porto franco a mezzo nostro corriere di fiducia;
- ordini singoli (non cumulabili) di importo inferiore ad Euro 600,00: spedizione in porto franco con addebito in fattura di Euro 10,00;
- ordini singoli (non cumulabili) di importo inferiore ad Euro 100,00: spedizione in porto franco con addebito in fattura di Euro 10,00 + addebito di € 10 per oneri gestionali.

Riepilogando:

Valore ordine	Trasporto / Addebito	Oneri gestionali
Maggiore di Euro 600,00	Porto Franco	-
Minore di Euro 600,00	Euro 10,00	-
Minore di Euro 100,00	Euro 10,00	Euro 10,00

11. SERVIZIO RAPIDO:

- Per garantire il servizio, gli ordini devono essere inviati esclusivamente via email all'indirizzo: rapido@krino.it.
- Per ordini ricevuti entro le ore 10,00 viene garantita la spedizione il giorno lavorativo successivo, salvo indisponibilità del prodotto.
- Per ordini ricevuti dopo le ore 10,00 viene garantita la spedizione entro due giorni lavorativi, salvo indisponibilità del prodotto.
- Numero righe ordine non superiore a 10.
- Non è possibile effettuare aggiunte / modifiche all'ordine trasmesso.
- Possibilità di ritirare il materiale c/o la nostra sede, senza addebito.

1. ORDERS:

When an order is placed, all conditions are automatically accepted by the client. The order is irrevocable but we reserve the right to accept it. All orders should specify the items numbers.

2. PRICES:

All prices are ex works (packing, VAT and freight excluded).

3. PACKAGING:

Is free, a part of special requirements extra charged.

4. SHIPMENT:

It can be CIF with invoice charge, by parcel post or with a forwarding agent suggested by the customer.

5. DELIVERY TIME:

Is purely indicative.

6. CLAIMS:

They should be notified within 8 days from the date of goods receipt. We shall only arrange free replacement of the tools acknowledged as defective ones by us. In case of dispute, the Civil Court of LECCO will be competent.

7. GOODS RETURNED:

Any goods return should be authorized by us.

8. PAYMENTS:

to be made directly to our head office. In case of late payment, we charge the bank interest rate, including additional expenses.

9. PRODUCTS CHARACTERISTICS:

The images of this catalogue are purely indicatives, we reserve the right to make modifications without any notice.

THE REPRODUCTION OF THIS CATALOGUE IS PROHIBITED.

Any clause contained into your order sheets which is in contrast with the above mentioned conditions it is not valid.
